M. Bagher Abiat

I'm a FullStack(FrontEnd more) JS developer and a nerd boy who loves writing JS & TS. I just learn things, So I'm not afraid of learning new things.

Writing

I like writing articles too, because I love teaching others and share my experiences. Here is my articles:

- Bugged.dev
- Medium
- Virgool

Information

- Phone: +989391981195
- Github: Aslemammad
- Telegram: Aslemammad

Projects | *Done*

Projects that are stable now.

Contextism

- React package to Improve your hooks and React context, So have bettter state management.
- Passed 1000/Week downloads
- Type strict

Xmoji

- We don't have strong emoji picker for our OS, So I built Xmoji for Win/linux with React/Electron
- Strong, Fast, Customizable

Coffee

- Don't miss nodejs, We built Coffee for config management for Deno

Espresso

- We built espresso to have a expressJs in Deno

Hangman

- A guess word game built with React/Typescript
- Good animations and Great performance

Bugged.dev

- My own SSG Blog for sharing knowledge.

Simple Shop Website

- A practice project for simulating an ecommerce shop.

Projects | *Working*

Projects that aren't done yet and I'm currently working on, So They have bugs now, They'll be done soon.

PySpider Website

- Practice/Challenge website for PySpider Community built with NextJs/ReactJS/Typescript
